NOTE: Data are based on preliminary estimates.

- Most state assignments are based on end-of-year residence obtained from electronically filed employer wage reports; the remainder are based on location of employer from reports filed on paper.
- Workers with earnings in both wage and salary employment and self-employment are counted in each type of employment but only once in the total. National and state totals and subtotals are unduplicated counts of workers in each type of employment.
- Includes Social Security taxable wages as reported by employers and Social Security taxable self-employment income as reported by self-employed individuals. Annual maximum taxable earnings for Social Security (OASDI) from a single employer or from self-employment were \$110,100 in 2012. Totals do not necessarily equal the sum of rounded components.
- For 2012 earnings, paid at the rate of 6.2 percent of taxable wages by both employees and employers, 6.2 percent of taxable tips by employees, and 12.4 percent of self-employment income by self-employed workers. Data are unadjusted for multi-employer tax refunds. Totals do not necessarily equal the sum of rounded components.
- Persons employed in American Samoa, Guam, Northern Mariana Islands, and U.S. Virgin Islands; U.S. citizens employed abroad by U.S. employers; persons employed on U.S. oceanborne vessels; and workers with unknown residence.
